

A Few Facts of Life...

- That tiny dot, the size of a period, is the size we are when we are implanted in our mother's womb, which occurs in the first week of life. At this time everything about us is known, whether we will be male or female, the color of our skin, eyes, hair, how tall we will be.
- 4** weeks after you were conceived, your heart was beating.
- 6** weeks after you were conceived, brain waves could be detected.
- 10** weeks after you were conceived, you probably sucked your thumb and could feel pain.
- 1** number is all it takes to get the information you need to deal with a difficult situation. For help call **313-952-2147** or email a counselor at: **redfordpcc@aol.com**

Helping Women Face Tough Choices

How Can We Help?

For many women, becoming pregnant is not a joyful occasion. They may feel pressured, confused or just in need of someone to answer their questions. Our goal is to provide such women with information and support.

Our counselors are trained to LISTEN and to assist each person according to their individual needs. If you are looking for someone who will LISTEN to you, we are here and ready to help. All information received is CONFIDENTIAL.

Whether you think you are pregnant, have recently become pregnant, or are struggling with thoughts of a previous abortion, we offer confidential counseling and program referrals that can help you.

Specific Services

FREE PREGNANCY TESTING

Tests are 99.99% accurate and immediate results are shown to the client.

Our Staff

All our counselors, hotliners and receptionists are unpaid volunteers. The expenses for our Center are paid by the love offerings of individual people who want to make a difference in the lives of others.

But more than giving time or money, we volunteers want to show others that a decision made out of love is the best solution to tough choices.
